CLAIMS 1-96 ARE PRESENTED FOR EXAMINATION

DETAILED ACTION

Applicant's election without traverse of CLAIMS 77-96 in Paper No. 5 is acknowledged.

Claims 77-96 have been examined without considering or examining any of claims 1-76.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 77-96 are rejected under the judicially created doctrine of double patenting over claims 1-31 of U. S. Patent No. 6,541,520 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the claims of the application are drawn to the treatment (changing-addiction-related behavior) of various addictive substances, e.g. cocaine, nicotine, methamphetamine, morphine, etc. It would be obvious to use

Art Unit: 1617

applicants' claimed active agent, topiramate in the treatment of the claimed addictions since it is taught in the abstract and at column 10, lines 28 of the patent that topiramate can treat addictions. The patent claims are drawn to changing addiction-related behavior, i.e., treatment. The method claimed in the present application could have been claimed in the patent since tomiramate is taught in the patent to treat addictions. This obvious type double Patenting rejection is deemed proper.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

None of the claims are allowed.

The non-elected claims should be cancelled to accelerate the prosecution of the subject application.

Applicants are requested to review their portfolio of applications to determine if there are other applications which may be subject to an obvious type Doublbe Patenting rejection.
